

Group Collaboration

Overall, we felt we all worked very well as a team. None of us had any experience with Java so we all helped each other in learning what we needed to in order to complete the project. We had weekly meeting on a Tuesday to discuss how the project was going and if there was any issue and to set goals and targets for the following week. As well as this we had some time in the labs or after the labs to meet and collaboration on anything that needed our immediate attention. We also had a WhatsApp group for any questions or clarifications. We found the project quite tough, but we all learnt a great deal and felt being in the team really helped us to learn and keep motivated. We would definitely all be happy to work in a team again as we felt we got on very well.
